Bureau of Internal Oversight

Audits and Inspections Unit

May 2022 Traffic Stop Data Inspection

Inspection Report# BI2022-0068

Background:

The Audits and Inspections Unit (AIU) of the Bureau of Internal Oversight (BIO) inspects Traffic Stop Data collected in the TraCS system on a monthly basis. The purpose for the inspection is to ensure compliance with Office policies and to promote proper supervision. A total of 35 traffic stops are selected each month for review. To achieve inspection results the inspector will utilize the TraCS system, JWI, I-Net Viewer, Body-Worn Camera video, (www.Evidence.com), and Communication Recordings. These entries will be uniformly inspected utilizing a matrix developed by the Bureau of Internal Oversight. Additionally, a JWI inquiry will be made on all deputies involved in the traffic stop, if needed, to determine if a license and/or warrants check was run during the stop.

Matrix Procedures:

Utilize the *Traffic Stop Data Matrix* to inspect and ensure each traffic stop reviewed is within compliance with Office policies. Each Matrix Inspection Element is listed below in the results section of this report.

Criteria:

- MCSO Policy EA-3, Non-Traffic Contacts
- MCSO Policy EA-11, Arrest Procedures
- MCSO Policy EB-1, Traffic Enforcement, Violator Contracts, and Citation Issuance
- MCSO Policy EB-2, Traffic Stop Data Collection
- MCSO Policy EB-11, Vehicle Impound 3511
- MCSO Policy GE-3, Property Management and Evidence Control
- MCSO Policy GJ-3, Search and Seizure
- MCSO Policy GJ-35, Body Worn Cameras
- MCSO Policy GF-3, Criminal History Record Information and Public Records
- MCSO Policy CP-1, Use of Force
- MCSO Policy CP-2, Code of Conduct
- MCSO Policy CP-5, Truthfulness
- MCSO Policy CP-8, Preventing Racial and Other Bias Based Profiling
- Briefing Boards: 09-31, 14-12, 15-04, 17-14, 17-43, 18-12, 18-15

Conditions:

The MCSO reviewed 35 randomly selected traffic stops made during the month of May 2022. Additionally, 10 of the 35 were selected for Body-Worn Camera review.

Results:

Each Traffic Stop will be counted as one inspection and all applicable matrix criteria inspection points will factor into an over-all compliance score. Example: If one Traffic Stop contains 37 inspection points (6 not applicable) and 2 deficiencies it will count as one Traffic Stop Inspection with a compliance score of 94.00%. The over-all compliance score for the monthly inspection will be the average score of the 35 stops reviewed.

The compliance rates of the provided traffic stop sample, utilizing the 37-inspection criterion, resulted in an overall average compliance rate of **99.40%** for May of 2022, as illustrated in the graph below.
